WHO AM I?

Bringing over a decade of expertise in .NET development and Microsoft Dynamics, I launched my freelancing venture in 2019, focusing on Dynamics 365 CE and the Power Platform. I've conducted training sessions for aspiring graduates in Albania, helping them enhance their skills in these platforms. Beyond technical proficiency, I possess strong soft management skills, honed through successful project deliveries. Let's explore how my experience can benefit your team.

EXPERIENCE

FISOFT Consulting 2021 - Present

Founder, D365 CE & PowerPlatform Projects

PROJECTS:

- ClickDimensions (USA):
 - Extended a core service to support Campaign Automation.
 - Developed a complex PCF (Advanced Find OOB "copy") to manage marketing lists and segments with a custom approach, storing records in a separate database instead of Dataverse.
 - Integrated multiple Angular applications within the Model-Driven App for enhanced functionality.
- AirPlus A+ (DE):
 - Joined the Data Integration team to enhance communication with third-party services.
 - Resolved a complex integration issue where incoming data to CRM was in a dynamic JSON format, with a variable that could be a 2D array, null, string, or array, by leveraging string manipulation.
 - Optimized integration performance and reduced data transfer size between services.
- TrueBlue - AiDEA (IT):
 - Part of the AiDEA product team, extending core functionalities, including Flows and Canvas Apps.
 - Transitioned to managing a delivery team, overseeing customer bug fixes and feature development.
 - On the customer side:
 - Prepared and managed Sandbox and Production environments.
 - Handled solution versioning and upgrades.
 - Led custom development from Dev to Prod.
 - Migrated data using Microsoft's OOB tool and KingswaySoft.

HISTORY

"Success is not a destination; it's a journey of continuous improvement and relentless dedication."
